PROFESSIONAL SUMMARY

Frontend developer with 7 years of professional experience, building and maintaining production applications for high-traffic SaaS and e-commerce companies. Specialized in translating product and design requirements into clean, maintainable, responsive frontend code with full ownership.

Experienced in building AI native features, such as UIs interacting with real time voice and text agents, updating the UI state based on the agent responses.

Proficient in remote-async collaboration in Agile cross-functional teams. Strong focus on fast delivery and code quality, increasing productivity utilizing modern AI tools, and maintaining low-friction communication.

SKILLS

Frontend: ReactJS, React Native, JavaScript / TypeScript, jQuery

Full-Stack: Next.js, Remix, Ruby on Rails, FastAPI, Jinja2, REST APIs, Prisma, PostgreSQL, MongoDB

Styling & UI: Tailwind CSS, SCSS, Styled Components, Responsive UI / UX, Shadcn

State Management: Redux, React Query, Context API

Tools & Infrastructure: Git, GitHub, Bitbucket, Jira, Docker, Webpack, CI/CD, Jenkins, Figma, Storybook, Google Tag Manager, Google Analytics (GA4), A/B Testing, Stripe, Vercel, Cursor AI, LiveKit, ElevenLabs

EXPERIENCE

[Adzuna.co.uk](https://adzuna.co.uk)

Contract / Remote - *Frontend Developer*

09/2022 - Present

Tech Stack: ReactJS, React Query, Tailwind CSS, Next.js, React Native, Template Toolkit, FastAPI, Jinja, Docker, Jenkins, LiveKit, ElevenLabs

Developed and maintained React, Next.js, Template Toolkit and FastAPI features for the whole span of the company products and the job board serving over 10 million users.

Increased revenue per user and conversion rates by +11% through successful A/B tests for core UI elements, by modernizing job cards and filters UI and functionality.

Created AI-powered features using LiveKit and ElevenLabs, including an interview preparation tool and a cutting edge AI text/voice onboarding chatbot to increase user lifetime value (LTV).

Improved page load speeds and overall SEO performance metrics using PageSpeed Insights and Lighthouse.

Configured and maintained Google Analytics (GA4) and Google Tag Manager setups.

Investigated and underwent the complete rewrite of the mobile applications to React Native to allow budget savings of up to €20,000 annually.

Collaborated asynchronously across Europe with a distributed, remote-first engineering team

[Skriba.ch](https://skriba.ch)

Contract / Remote - *Full-Stack Developer - Startup*

10/2024 - 04/2025

Tech Stack: Next.js, Remix, Tailwind CSS, Prisma, PostgreSQL, AI Integrations, Shadcn

Maintained the legacy Next.js web app and refactored it into a modern Remix web application utilizing Shadcn and PostgreSQL, enabling seamless user onboarding and document creation flows, via multi-step stateful forms.

Integrated AI-powered features into the document editing tools to reduce manual user input and elevate conversion rates while reducing the time it takes to create documents.

Iterated end-to-end features rapidly with an emphasis on reliability and usability within a fast-paced startup environment.

[Skroutz.gr](https://skroutz.gr)

Full time employee / Remote - *Frontend Developer*

04/2019 - 10/2024

Tech Stack: Ruby on Rails, React, Redux, SCSS, React Native

Worked as part of the core frontend team for Greece's largest e-commerce marketplace, implementing mission-critical user flows serving millions of monthly visitors.

Refactored legacy Ruby on Rails components into reusable React components using Hooks and modern practices, improving developer velocity and codebase maintainability.

Delivered end-to-end features and contributed to design system consistency while working closely with product managers and designers.

Picked up backend development tasks, including database schema migrations.

Participated in the development of the Skroutz Food delivery applications from scratch, in both the web (React, Rails) and the React Native mobile apps to ensure a uniform user experience.

PROJECTS

[Simounbooks.gr](https://simounbooks.gr)

05/2026 - Present

Tech Stack: Next.js, Tailwind CSS, MongoDB, Vercel, Stripe, Biblionet API

Launched a fully functional e-commerce bookstore platform for a local bookshop. Implemented a comprehensive admin dashboard to handle books, orders, and category management.

Integrated Stripe for payment processing using pre-built checkout interfaces and webhooks.

Connected with the Biblionet.gr REST API for automated book catalog updates.

Deployed on Vercel to optimize runtime performance and keep ongoing operational costs minimal.

[Synopsisapp.com](https://synopsisapp.com)

01/2024 - 12/2024

Tech Stack: Next.js, PostgreSQL, Tailwind CSS, Docker

Co-developed a healthcare practice management web application tailored for speech and occupational therapists.

Built appointment scheduling, clinical notes, and patient tracking using Next.js and PostgreSQL.

Partnered directly with practicing therapists and UI designers to address domain-specific workflows.
